Re: Endangered Species Review and Air Contaminant Data
South Cavalcade Site

Dear Ms. Craig:

I have requested the U.S. Fish and Wildlife Service to determine if any endangered species may inhabit the South Cavalcade site. They have informed me by the attached letter that no listed endangered species would be affected by remedial action at the site. Please incorporate this information into your discussion of ARARs in the Feasibility Study report.

I have also enclosed some recently received information about air contaminants in the Houston area. Please include this information in the discussion of atmospheric monitoring in the Remedial Investigation report.

Sincerely yours,

James F. Pendergast, D.E.
Remedial Project Manager
Superfund Enforcement Section
